Limited night lane closures on Boundary

Starting Monday night, construction crews working on storm drains and curbing will need to close sections of one southbound Boundary Street lane heading into downtown Beaufort this week from 8 p.m. to sunrise.

The lane closure area is at only two intersections – Boundary and Hogarth Street and Boundary and the K-Mart shopping center signal. In those areas, one southbound lane will remain open for traffic during the work.

This work is unrelated to repairs to the small sink hole at Marsh Road near the Beaufort County Government Center. The Boundary Street project team is coordinating those repairs with the South Carolina Department of Transportation. The sink hole repair work will be done in a night time lane closure but the dates and times of that work haven't been set at this time.
