STATEMENT OF UNDERSTANDING BY PRIME CONTRACTOR

1. Subcontractors shall be licensed on the same basis as general or prime contractors for the same job, and no deductions shall be made by a general or prime contractor for value of work performed.
2. The contractor must furnish the City a list, including the NAME, ADDRESS, AND AMOUNT OF EACH CONTRACT for all subcontractors and individual craftsmen or artisans, not regularly employed by the job by contract, by day labor, or by the hour and receive pay therefore.
3. If the subcontractor or craftsmen are unknown at the time the permit is applied for, the prime contractor shall furnish the City with such a list prior to the subcontractor's performance of said work. However, if the project is considered 'minor', subcontractors shall be listed prior to permit being issued and all licenses verified.
4. The prime contractors, before requesting permanent utility service or final inspection (Certificate of Occupancy) from the Codes Enforcement Office, SHALL complete said subcontractors list and turn in, along with all fees paid in full.
5. As the prime contractor, it is your responsibility to make sure all subcontractors working on your job have a current business license and are registered with the State (if applicable). If not, as the prime contractor, you will be responsible for the subcontractors business license fees. Such violations shall be punishable by a fine not to exceed the maximum penalty allowed by state law and/or 30 days imprisonment, or both, at the discretion of the court for each violation. **THERE WILL BE NO EXCEPTIONS TO THIS REQUIREMENT.**

I, the undersigned, have read and understand the above statement and have received the subcontractor's form from the Codes Enforcement Office or the Business License Office.

BJWSA SEWER TAP SPECIFICATIONS 2010-2011

The intent of these specifications is to ensure that every service lateral connected to BJWSA's sewer collection system will perform properly for the life of the building it serves. Inspections will emphasize the following criteria: quality of materials used, grade maintained along the full length on the pipe, assess to the pipe in the event that service is needed, conformance to all applicable County codes and construction techniques.

1. If preexisting sewer lateral is stubbed out at a lot property line, the contractor must slope lateral to this stub out. No other taps to the gravity main or manholes shall be made without approval of the Authority. The contractor must verify location and elevation of this lateral before laying out the plumbing plans.
2. The lateral must be constructed of 4" or 6" either SDR-35 (ASTM-3034) gasketed sewer pipe or SCH-40 **DWD** PVC pipe. Do not mix pipe types. Use either all SDR-35 (ASTM-3034) or all SCH-40 **DWD** PVC. **Commercial buildings must be 6".**
3. All Laterals using SDR-35 gasketed pipe must also use gasketed fittings. No petroleum-based pipeline shall be used. All lettering on pipe must be on top and exposed.
4. All laterals using SCH040 **DWD** PVC must use glued fittings. All fittings must have purple primer/cleaner and grey medium glue. All lettering must be on top and exposed.
5. There must be a dual sweep clean out at building and a 4" clean out at the property line. All clean outs except the one directly adjacent to the building shall include a PVC cap surrounded by a metal valve box with a sewer lid. Clean outs shall not exceed 70' apart. All bends must be separated by at least 12" of pipe.
6. The minimum finished grade of the pipe is 1/4 -inch per foot on 4" and 1/8-inch per foot on 6". The Authority will determine if this grade can be modified. A minimum 1-foot cover is required for all lateral piping.
7. If an excessive number of bends are used, the Authority may require extra clean outs.
8. All clean outs must be turned towards the main and set to final finished grade.
9. Pipe must be run as straight as possible with no more than a 5% deflection. The start and finish point must be verified by a leveling instrument before laying pipe.
10. The plumber will be responsible for barricading off any open holes or ditches.
11. The contractor must call the Operations and Maintenance office at 843-987-9209 between the hours of 7:30 am and 4:00 pm to schedule sewer tap inspections for completed taps. Barring emergencies, inspections will be done on Mondays, Wednesdays, and Fridays only. Information for an inspection may be called in up to 4:00 pm the afternoon before an inspection day or fax to **843-987-9234** also it can be e-mailed to **inspection@bjwsa.org**. We cannot schedule a specific time for an inspection.
12. If an inspection fails or is not complete, the plumber is responsible for correcting the problem and calling the Operations and Maintenance office for a re-inspection. There will be a **\$65 re-inspection fee**. The re-inspection will be the clean out nearest the building. A copy of the approved form will be E-mailed to the proper Building Codes Department. Permanent power connection will not be allowed until the Building Codes Department is notified of the approved sewer inspection or a letter is received from BJWSA allowing permanent power but no CO.

Revised 7/16/2010

**REQUEST APPLICATION TO REMOVE TREE(S)
TO BUILDING OFFICIAL, CITY OF BEAUFORT**

Phone: 843-525-7040 / Fax: 843-986-5606

No tree having a diameter at breast height (DBH) of eight (8) inches or greater, as measured at a height of four and one-half (4 1/2) feet above the ground, may be removed unless a tree removal application has been submitted and approved in writing by the administrator (per Section 7.3.C.2.a).

The undersigned, this _____ day of _____ 20____, hereby request to remove _____ tree(s)
on the lot or land owned by _____,

Site address _____

For the following reasons _____

PLEASE NOTE: CONTRACTORS ARE RESPONSIBLE FOR REMOVING AND PROPERLY DISPOSING OF ALL TREE DEBRIS FROM THE JOB SITE (I.E. CANNOT BE LEFT ON CURB FOR OTHERS TO PICK UP). TRUNK SECTIONS KEPT BY PROPERTY OWNER SHALL BE LOCATED IN REAR OF PROPERTY.

Identify house and indicate location of tree(s) to be removed.
Tree(s) **MUST** be marked.
